How to Enable Location on [Android and Apple] Mobile Device

Android Device

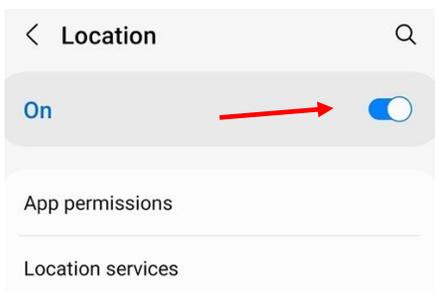

1. Open "Settings"

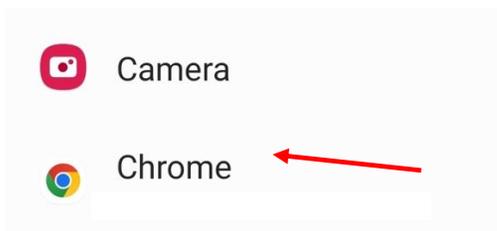

2. Scroll down to "Location"

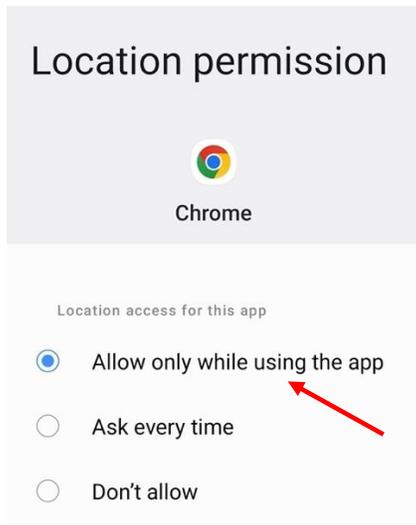

3. Verify that it is "On"

4. Scroll down to internet browser. Example shows Chrome (suggested browser)

5. Select “Allow only when using the app” and close settings

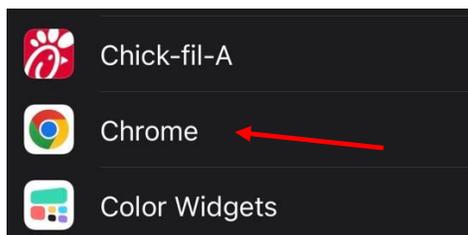

6. Open SpokeChoice
 - a. Log in with username and password
 - b. Select AutoVisit > Clock in
7. Pop-up will load, select “Allow” for SpokeChoice to access your location

Apple Device

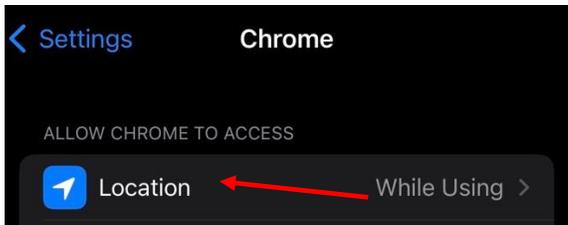

1. Select “Settings”

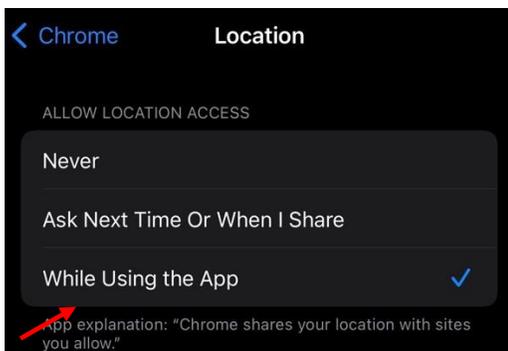

2. Scroll down to internet browser. Example shows Chrome (suggested browser)

3. Select "Location"

4. Select "Allow when using app" and close settings

5. Open SpokeChoice

- a. Log in with username and password
- b. Select AutoVisit > Clock in

6. Pop-up will load, select "ok" for SpokeChoice to access to your location
